Economic Impact Table FY2026 RSAD

<u>DIRECTIONS:</u> List each proposed sporting event for FY2026 in column A. List the number of hotel nights generated from the previous year's event in column B (for new events, provide an estimated number of hotel nights to be generated). Explain your hotel number in column C (for new events show the rationale behind the number, i.e. Event B is similar to Event A from the previous year in size and scope and therefore we would expect the same number of rooms to be used). The sheet will automatically apply the Average Daily Rate of \$109.32*

*ADR (Average Daily Rate) for 2024 in Iowa is \$109.32

Applicant:

Event	Total Number of Hotel Nights Generated	Reasoning For Number of Hotel Nights.	Total Estimated Economic Impact
		Based on the number of nights booked	
EVENT A	100	from the previous year's event	\$ 10,932.00
		EVENT B is similar to Event A from the	
		previous year in size and scope and	
		would expect the same number of	
	100	rooms to be used	\$ 10,932.00
